

# Develop a Web Application using frontend stack

**Project details:** The Online Test Application system creates an application that enables users to provide online tests, review them, and display the results.

**Developer details :** Abhishek Zende

---

## **Background of the project:**

- >This system contains three main modules: Quiz, Review, and Result.
- >The quiz section of the online test application accepts the questions in JSON format.
- >The JSON file can be easily shared from the server in the pre-defined format.
- >The application renders the test at the client-side.
- >The “Review and display result” section allows users to declare the results immediately.
- >You can simply call another JSON with the answers in it and evaluate and display the results immediately.
- >I am simply design a quiz without Backend.

## **Core Concept used in the Project:**

Html ,Css , JavaScript, Bootstrap , Angular ,Scss
